GitHub: <https://github.com/kaveh163/>

Full Stack Developer with expertise in front and backend JavaScript, SQL, PHP and Laravel. Innovative and passionate about developing web apps while collaborating in a team-oriented work environment. Gained skills in HTML, CSS, JavaScript, jQuery from Pishkesvatan College. Earned certificates in Full Stack web development from Laitec College (Learning Information Technology Lab). Have previous background in Chemical Engineering (BEng) and Environmental Engineering (MSc).

Technical Skills

Languages: HTML5, CSS3, JavaScript ES6+, JQuery, React, Node.js, PHP, Laravel, SQL, NoSQL

Databases: MongoDB, MySQL

Version Control: Git, GitHub

Frameworks: Express, Pug, Handlebars, Bootstrap 4

Projects

Food Recipe App | [GitHub](#) | [Website](#)

- A social media app that lets users view recipes posted by users of the app. Also allows users to create recipes when they have registered and logged in. Includes a search facility to find recipes based on input ingredients. Features an admin mode which gives the user special privileges to do tasks such as deleting recipes.
- Technologies: HTML, CSS, JQuery, AJAX, local storage, Node.js, Express, Passport, Sequelize, MySQL

Weather App | [GitHub](#) | [Website](#)

- A weather app that uses the OpenWeather API to retrieve weather data for cities entered by the user. Keeps track of already visited cities using local storage.
- Technologies: HTML, CSS, JQuery, AJAX, Bootstrap 4

Employee Tracker | [GitHub](#)

- A CLI based Content Management System for managing a company's employees. Takes advantage of promise based API in the MySQL NPM package to implement

various SQL queries such as SELECT, INSERT, UPDATE and different types of JOINS. Uses inquirer.js to implement the CLI.

- Technologies: Node.js, Inquirer.js, MySQL

Article Manager | [GitHub](#) | [Website](#)

- An app that uses REST API to perform CRUD operations for managing articles while validating input using express-validator.
- Technologies: HTML, CSS, JQuery, AJAX, Forms, Bootstrap 4, Express, Node.js

Work Day Scheduler | [GitHub](#) | [Website](#)

- A simple calendar application that allows the user to save events for each hour of the day.
- Technologies: HTML, CSS, JQuery, Bootstrap 4, local storage

Blog Post | [GitHub](#) | [Website](#)

- A blog post which allows the admin to post topics and other users to interact with the blog through leaving comments and replies to those comments.
- Laravel 7 Eloquent ORM, Laravel 7 Blade template.

Education

JavaScript (Frontend-Backend) Certificate - Laitec College - IT Learning Lab - Tehran, Iran, 2020

PHP Programming + Laravel Certificate - Laitec College - IT Learning Lab - Tehran, Iran, 2020

HTML, CSS3, JavaScript, jQuery - Pishkesvatan College - Tehran, Iran, 2019

Master of Applied Science in Environmental Engineering - Azad University - Science and Research Branch Tehran, Iran, 2018

Bachelor of Chemical Engineering - Sharif University - Tehran, Iran, 2011

Computer and Systems Engineering - Carleton University - Ottawa, Canada

(Passed courses including Data Structures and Algorithms)
